

A World In Motion

PRIMARY | ELEMENTARY | MIDDLE SCHOOL

Educating Students. Empowering Teachers. Engaging Volunteers.

A World In Motion

# Introduction

SAE International's **A World In Motion® (AWIM®)** program is an inquiry-based learning experience that brings STEM concepts to life, setting students on a path of lifelong discovery.

AWIM combines practical, hands-on learning with mentorship from volunteers to provide equitable access to STEM.

We invite you to explore our K-8 curriculum challenges!

# **AWIM Primary (K-3) Series**

# Engineering Inspired By Nature

- Students investigate seed dispersal and design & build flying toys
- Core concepts
  - Newton's Laws of Motion
  - Forces
  - Engineering
- Suggested 9 lessons over 11 days

# Making Music

- Students investigate, design & build musical instruments
- Core concepts
  - Sound
  - Longitudinal and Transverse Waves
  - Pitch
  - Amplification
- Suggested 7 lessons over 10 days

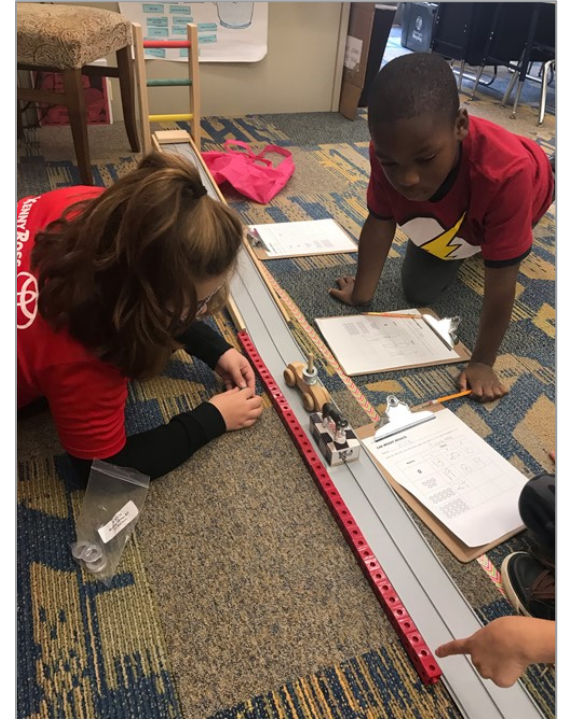

# Pinball Designers

- Students design & build non-electronic pinball games
- Core concepts
  - Gravity
  - Potential and Kinetic Energy
  - Inclined Planes
  - Probability
- Suggested 8 lessons over 9 days

# Rolling Things

- Students experiment with variable testing using cars and ramps
- Core concepts
  - Potential and Kinetic Energy
  - Mass
  - Gravity
  - Velocity
  - Momentum
- Suggested 7 lessons over 12 days

# Straw Rockets

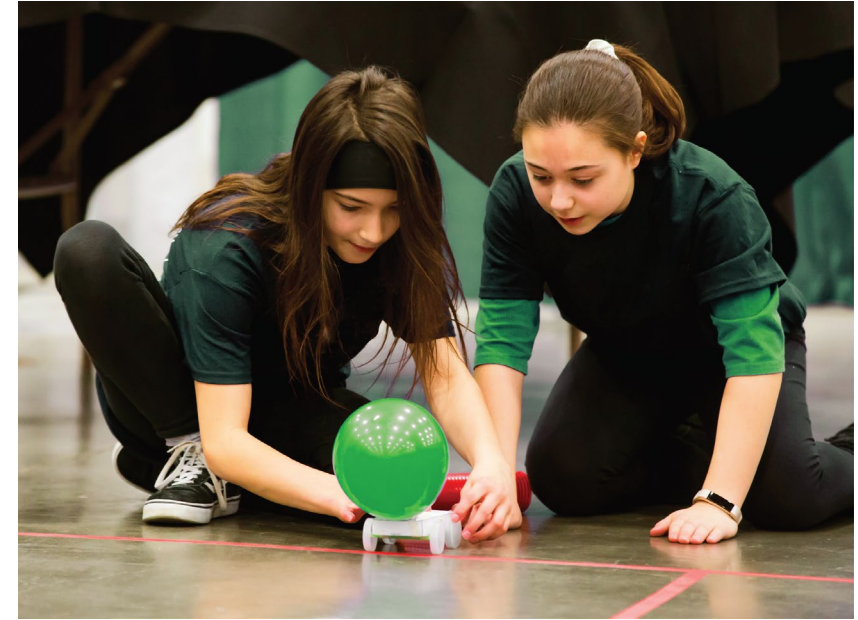

- Students design and build simple rockets
- Core concepts
  - Newton's Laws of Motion
  - Forces
  - Engineering Design
- Suggested 7 lessons over 8 days

# AWIM Elementary (4-6) Series

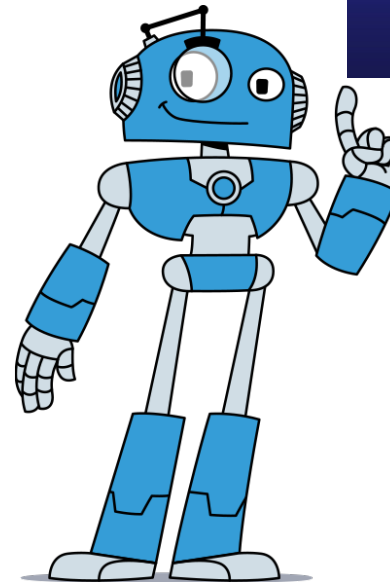

# JetToy

- Students design balloon-powered cars
- Core concepts
  - Newton's Laws of Motion
  - Forces
  - Engineering
- Suggested 11 lessons over 15 days

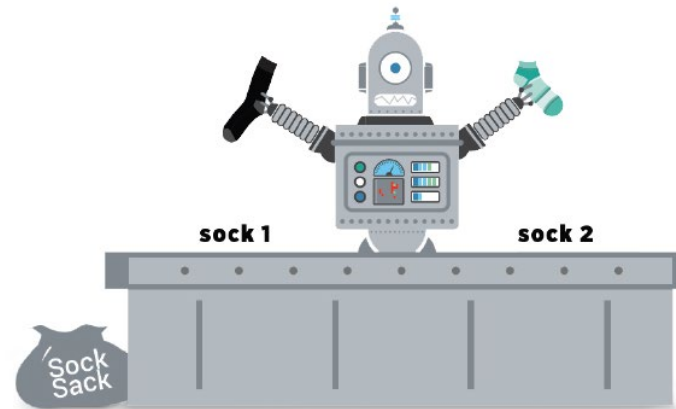

# Navigating the Digital Universe

- Students learn about their rights and responsibilities as digital citizens through dynamic activities
- Core concepts
  - Digital safety
  - Communication
  - Media Literacy
  - Ethics
- Suggested 11 lessons over 15 days

# Programming Each Other

- Students explore complex programming concepts by systematizing simple activities
- Core concepts
  - Computational thinking
  - Conditional statements
  - Looping
  - Error handling
  - Variables
- Suggested 11 lessons over 15 days

# Skimmer

- Students design & build fan-propelled sailboats
- Core concepts
  - Air resistance
  - Balance & stability
  - Friction
  - Propulsion
  - Surface area
- Suggested 10 lessons over 15 days

# AWIM Middle School (6-8) Series

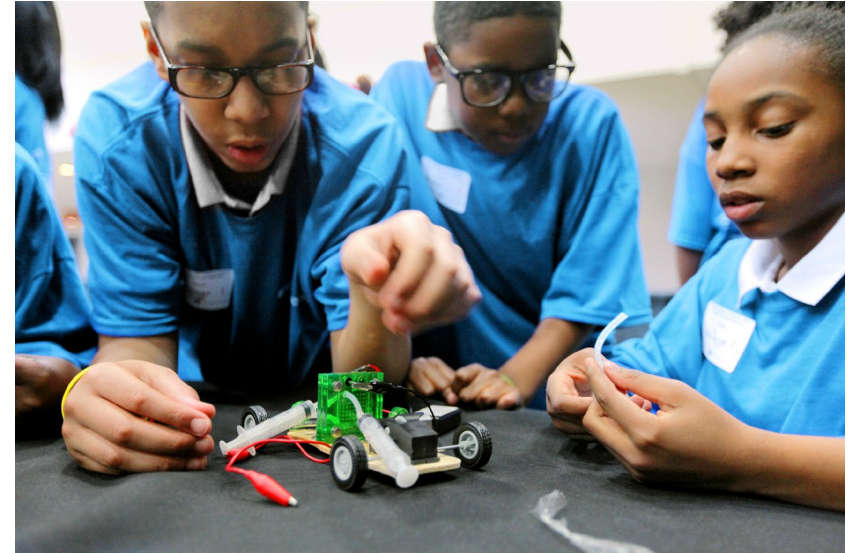

# Cybersecurity: Keeping Our Networks Secure

- Students explore the structure of the internet and data protection
- Core concepts
  - Internet structure and protocols
  - Encryption and decryption methods
- Suggested 10 lessons over 12 days

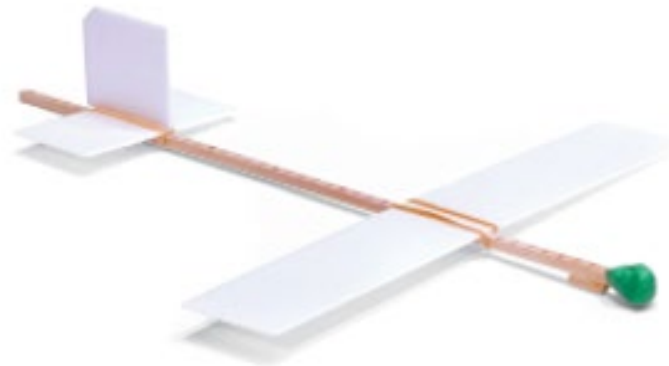

# Fuel Cell

- Students explore alternative power sources to design & build toy cars
- Core concepts
  - Forces
  - Newton's Laws of Motion
  - Green design
  - Energy transformations
- Suggest 12 lessons over 15 days

# Glider

- Students build, test, & modify gliding toys
- Core concepts
  - Forces
  - Motion
  - Gravity
  - Engineering Design
- Suggested 18 lessons over 23 days

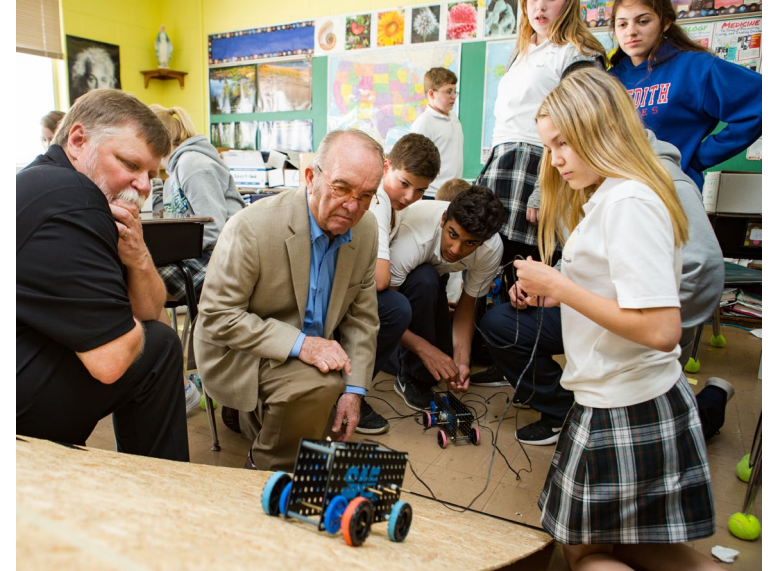

# Gravity Cruiser

- Students build, test, & modify vehicles powered by gravity
- Core concepts
  - Forces
  - Motion
  - Gravity
  - Engineering Design
- Suggested 10 lessons over 15 days

# Motorized Toy Car

- Students design & build gear-driven toys
- Core concepts
  - Force
  - Speed
  - Torque
  - Simple machines
  - Gear ratios
- Suggested 17 lessons over 23 days
